

The Lemcol range of materials handling equipment has been designed and manufactured to provide high quality, low maintenance products suitable for factory and general use. They reduce the physical effort involved in many manual handling operations and improve efficiency, as well as provide a safer working environment

Lemcol Drum Truck

This product has been manufactured for ease of handling 200 litre drums and hogsheads.

Due to the unique design, size and relative weight makes almost no difference to the balance and efficiency of the Drum truck.

The L60 is of steel construction with strain points specially reinforced to withstand the toughest treatment.

The models are offered with two types of wheels. Cushioned tyred wheels provide a greater capacity while having the added advantage of being puncture-proof. Pneumatic wheels are offered where greater shock absorbency is required or where operating conditions are a consideration.

When stored in an upright position, the compact L60 requires only 0.3m² of floor space.

12 Month Warranty

This range carries our standard 12 month warranty against faulty workmanship and materials, and is backed by a service and parts network Australia wide.

DRUM TRUCKS				Dimensions in mm		
Width (mm)	Capacity (kg)	Wheel Model No.	Wheel Type	Wheel Dia. (mm)	Model Number	Product Code
600	320	L11250RLD-K	Cushion	280	L60S	04920704
600	280	L4210RLD-KB	Pneumatic	270	L60P	01057254

The drum truck can be loaded and unloaded in three easy stages

1. Bring the specially chiselled toe plate into contact with the drum.

2. Tilt the handles forward until the spring loaded catch grip passes over the drum's edge and locks into position.

3. Apply weight to the foot rest while tilting backwards so that the drum rests on the truck.

Unload by simply touching the catch grip and lift the handles simultaneously.
