

Load Capacities up to 125kg

- Pressed metal, double ballrace frames provide strength and durability
- Standard zinc plated or chrome plated finish available on all frames
- Swivel, fixed and bolt hole castors are available to suit wheel diameters from 75mm to 150mm
- Expanding, solid and threaded pintles are available for bolt hole castors
- Total lock brakes (suffix L) and directional Lock (suffix K) available on most swivel castors.
- Large selection of wheels to suit various operating environments
- 12 month warranty

Users include: Hospitals, Laboratories, Caterers, Offices, Fabricators and Furniture manufacturers

Manufactured to world standards, the strong metal construction ensures longer life and less operational down-time.

Frames

Pressed metal construction utilising a double ballrace to reduce wear. The main swivel race is sealed against dust to maximise the working life of the castor.

The standard finish is bright zinc plating. Frames are also available chrome plated where general appearance is a strong consideration.

Each size is available in swivel and fixed plates, and bolthole. For bolthole frames, expanding pintles, solid pintles and threaded pintles are available to suit various fixing requirements. Solid pintles should be used where a more rigid mounting is required, such as hospital beds. A simple side-mounted locking screw enables quick replacement if necessary. Threaded pintles with a 1/2 inch UNF thread are used in specialised equipment where a pre-tapped hole is the only means of fixing.

Total brakes are available across the whole range. Two-way directional locks are available on all models except 75mm, enabling the trolley to be used in fixed or swivel mode according to whether greater manoeuvrability or stable, straight tracking is needed.

Wheels

Diameters range from 75mm to 150mm with load capacities up to 125kg. Wheel materials include polyurethane, nylon, blue rubber and grey rubber. To prevent linen thread from being trapped around the wheel axles, thread guards are fitted as standard on all models except nylon. Mixes of bearing types are available to suit various applications.

12 Month Warranty

This range carries our standard 12 month warranty against faulty workmanship and materials, and is backed by a service and parts network Australia wide.
